# Prompts used for the Kelisim project

**1.** I need a user flow for our new project. The attached project proposal describes the product.

**2.** Please export it as a file that I can send to my teammates.

**3.** Please provide a Russian version.

**4.** Please read the attached design brief and then help me with my task.

**5.** I need user persona cards. Please make them in exactly the same style as the reference images I am attaching, with the content written in English and based on the design brief above.

**6.** Please insert the faces of these people into the persona cards.

**7.** Please replace “UNK” with “UCN”, and change “Finds Kelisim in a Telegram chat” to “Finds Kelisim through friends and colleagues”.

**8.** Please remove the outer margins so that the cards look as if they were made in Canva.

**9.** Here is our design brief. Please paraphrase it and translate it into English. You may remove the customer journey table and replace it with a short summary saying that we used Figma as a tool.

**10.** Please provide it as a PDF.
